# MOVING EUROPEAN CITIES TOWARDS CLIMATE NEUTRALITY!

MOBILITIES FOR EU: A groundbreaking initiative dedicated to pioneering sustainable solutions for urban mobility across Europe. We're shaping the cities of tomorrow by paving the way towards cleaner, more efficient mobility solutions for people and freight. By uniting the expertise of 29 leading European organisations from nine countries, MOBILITIES FOR EU showcases cost-effective, user-centered mobility concepts for passengers and freight, accelerating cities' journeys towards climate-neutrality and aiming for SCOPE 2 emissions reduction by 2030.

We will test the potential of innovative mobility technologies in real and diverse urban environments – in two Lead Cities, Madrid (ES) and Dresden (DE). Five Replication Cities – Ioannina (EL), Trenčín (SK), Espoo (FI), Gdańsk (PL), and Sarajevo (BA) – intend to replicate the Lead Cities' processes, designing their own adaptations for the tested solutions.

## MOBILITIES FOR EU IN A NUTSHELL

- 5-year duration
- 29 partners, coordinated by CARTIF
- Two Lead Cities: Dresden (DE), Madrid (ES)
- Five Replication Cities: Ioannina (EL), Trenčín (SK), Espoo (FI), Gdańsk (PL) & Sarajevo (BA)
